Training Health & Wellness: Aim

Our specific aim is to address the identified need for HIV/AIDS education in all sectors of industry and education institutions.

Objective

Prevent	transmission of HIV/AIDS through constant education
Empower	learner through knowledge and the facts about HIV/AIDS
Influence	learner who share their lives as partners, family and friends
Educate	learner about personal management of HIV and AIDS
Sustain	a culture of learning and understanding about HIV and AIDS.

This informative program offers a complete solution that addresses the following key areas:

PREVENT infection ↔ **EMPOWER** with knowledge ↔ **INFLUENCE** behaviour ↔ **EDUCATE** about options ↔ **SUSTAIN** a positive culture

How we do it

Our Health Computer Based Training program is a great means to educate your people about HIV, AIDS, ARV, STI & TB to name a few. With the help of innovative technology, we empower your people with information. The comprehensively researched content is delivered in a user-friendly and easy to understand format that achieves a high rate of information transfer and retention. The training program empowers your people with knowledge that enables them to protect themselves from HIV, STIs & TB infection. It also deals with guidelines for those who are already infected with HIV or TB.

Specific Benefits to Health e-Learning

- ⓧ Sensitive content can be addressed without discrimination
- ⓧ Possible embarrassing content can be viewed in private
- ⓧ “Taboo” topics are discussed without fear of judgment
- ⓧ Group pressure is eliminated
- ⓧ Overcome shortage of Peer Educators
- ⓧ The PC does not discriminate
- ⓧ Rapid roll-out & results
- ⓧ Continuous updates
- ⓧ New course added every 3 months at no additional cost
- ⓧ Sustainable 24/7/365 availability of training

Current Health Courses

- ⓧ HIV/AIDS - Info for Everybody
- ⓧ Tuberculosis - Info for Everybody
- ⓧ Diarrhoea - Info for Everybody
- ⓧ I had an HIV test - Now what?
- ⓧ Talking about Antiretroviral
- ⓧ Benefits of Good Nutrition
- ⓧ Balanced Nutrition Guide
- ⓧ Opportunistic Infections
- ⓧ Malaria
- ⓧ Hypertension
- ⓧ Diabetes
- ⓧ Cholesterol
- ⓧ Weight
- ⓧ Healthy Heart
- ⓧ Stress
- ⓧ Exercise
- ⓧ Emergency Tips

Powerful Reporting

The Learner Management System (LMS) provides a comprehensive set of powerful real-time reports so that you can measure your investment and view learner usage.

Course Usage Report: This report allows you to extract basic usage data on courses that have been accessed in the system.

User Usage Report: This report shows a single user's tracking data inside a course.

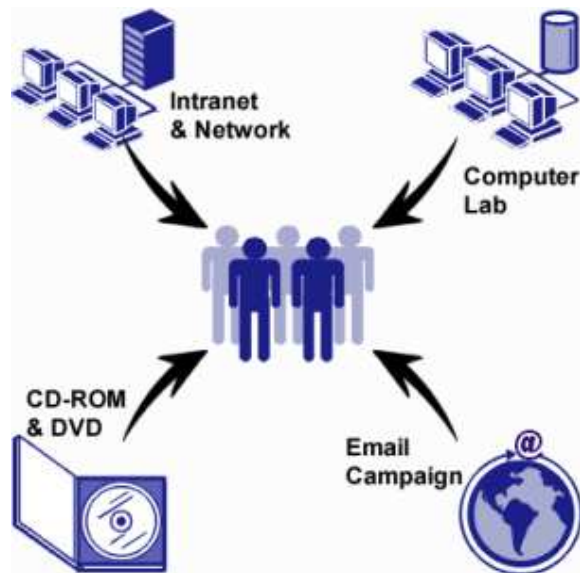

Certificates: Certificates of completion can be printed and customized from within the LMS.

Sustainable Commitment

Because we know and understand that there is an ever-changing face to HIV & other Sexually Transmitted Infections, we are in constant research and development of new training products. This effort ensures that you always have up-to-date training available for your people.

Delivery of Training

Streaming over your INTRANET or NETWORK this course delivers all the necessary information with minimal impact on your current network traffic. The training is also available on CD-ROM and DVD to enable you to reach the homes, friends & Family of the people of your organisation. The CD-ROM & DVD version is now available in English, French and Arabic.

LMS Requirements

Minimum System Requirements:

Server Hardware: (Multi user - Intranet environment)

- 1) 2 GHz Intel or AMD equivalent for +-30 active user connections. Consider a more powerful server for more user connections.
- 2) 1024Mb RAM.
- 3) 100 Mbps TCP/IP network connection (Ethernet).
- 4) 150Mb + 65Mb per course free Hard Disk space.

Server Software: (Multi user - Intranet environment)

- 1) Windows 2000 server, XP professional, 2003 Server.
- 2) Latest Service Pack for relevant Operating System.
- 3) Internet Explorer 6 or later.

Client Hardware:

- 1) 1 GHz Intel or AMD equivalent.
- 2) 512Mb RAM.
- 3) 100Mbps TCP/IP network connection (Ethernet).
- 4) 100Mb Free Hard Disk space (Temporary Internet Files).

Client Software:

- 1) Windows 2000 professional, 2000 server, XP Home, XP Professional, 2003 server + latest Service packs.
- 2) Internet Explorer 6 or later
- 3) Macromedia Flash Player 7 or later (included on CD)
- 4) Windows Media Player 7 or later (included on CD) Windows XP has version 8 pre-installed.

Considerations

Installation:

You need to logon as an administrator to run the installation file.
The server will require a restart after installation.

Macromedia Flash Player:

A player auto detection script runs when accessing the content. After installing or updating the Flash Player it is important to CLOSE all open Internet Explorer windows.

Windows Media Player:

A player auto detection script runs when accessing the content. After installing or updating the Window Media Player it is important to RESTART the computer.

SCORM 1.2

The LMS supports SCORM version 1.2.
API conforms to RTE level 3. All Mandatory and optional data elements supported.
